

International Opportunities

The University of Georgia Career Center
Clark Howell Hall, 706-542-3375, www.career.uga.edu

"International careers don't just happen. They are carefully planned and built up over a period of time. International employers insist that you have international experience before sending you to work abroad. The key to gaining international experience is to **dive into all things international** while you are at university and by **taking a gap year off**. You need to build up a host of international experiences before you are ready to start applying for professional international jobs." –Jean-Marc Hachey
